

A-Core Container

10 000W solar panel power generation

Overview

A 10kW Solar Kit requires up to 650 square feet of space. 10kW or 10 kilowatts is 10,000 watts of DC direct current power. This could produce an estimated 1,350 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.
