2025 Communication Base Station Wind Power Project

Overview

How many 5G base stations will China build next year?

China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

What will China's future look like in 2025?

As China looks toward 2025, it aims to blend technological prowess with industrial strength, ensuring that the country remains a key player in shaping the global economic and technological landscape, industry experts said.

Will China's industrial output grow in 2024?

The MIIT also forecast on Friday that China's industrial output will grow by 5.7 percent year-on-year in 2024 and will maintain its weight in the country's GDP. Revenue from the telecom sector, along with software and IT services, is expected to rise by about 11 percent year-on-year this year.
