

## A-Core Container

# 660 Double-glass solar module weight

## Overview

---

The Trina Solar TSM-DEG21C.20-660 is a high-power bifacial dual-glass module using monocrystalline high-density-interconnect cells, delivering 660 Wp with a module efficiency of  $\approx 21.2\%$ ; it measures  $2384 \times 1303 \times 33$  mm and weighs  $\approx 38.3$  kg. What is the voltage of a double-glass module?

The open-circuit voltage is between 53.30 V and 54.00 V and the short-circuit current is between 14.85 A and 15.41 A. The double-glass modules have a temperature coefficient of  $-0.28\%/C$  and a maximum system voltage of 1,500. Their size is  $2,382$  mm x  $1,134$  mm x  $30$  mm and their weight is  $33.5$  kg.

What is Trina Solar tsm-deg21c 20-660?
