

## A-Core Container

# Africa solar Energy Storage 120kw Inverter

## Overview

---

What is a hybrid solar inverter?

The ATESS 120kW hybrid inverter is a three-phase system that can operate with both grid-tied and off-grid solar installations. This inverter has a maximum DC input voltage of 1100V, making it compatible with a wide range of solar panel configurations. It has a peak efficiency of up to 98.6%, ensuring optimal energy production and utilization.

What is a sunsynk high voltage inverter?

2 x 50KW Sunsynk High Voltage Inverters – These advanced hybrid inverters seamlessly manage solar power, battery storage, and grid interaction. They provide intelligent energy distribution and efficient load balancing, optimizing power usage. AC Air Cooler – Maintains optimal battery temperature for longer lifespan and efficiency.

What is a sunsynk hybrid inverter?

With Sunsynk hybrid inverters and Sunwoda battery storage, this system is built for maximum efficiency and durability. 2 x 50KW Sunsynk High Voltage Inverters – These advanced hybrid inverters seamlessly manage solar power, battery storage, and grid interaction.

Why should you buy a sunsynk inverter?

Advanced Energy Management – The Sunsynk inverters intelligently optimize energy distribution, ensuring stable and efficient power output. Reliable and Safe – The system includes built-in safety features, such as emergency stop functionality and active cooling, to protect against overheating and system failures.

What is the peak efficiency of a hybrid inverter?

It has a peak efficiency of up to 98.6%, ensuring optimal energy production and utilization. The ATESS 120kW hybrid inverter comes with built-in energy

storage capabilities, allowing for efficient use of stored energy during peak demand periods.
