African Industrial Energy Storage Cooperation Program

Overview

The initiative, jointly launched by the UNECA in partnership with the Global Energy Interconnection Development and Cooperation Organization (GEIDCO), and the Association of Power Utilities of Africa (APUA), envisages providing training on EVs and energy storage .

The initiative, jointly launched by the UNECA in partnership with the Global Energy Interconnection Development and Cooperation Organization (GEIDCO), and the Association of Power Utilities of Africa (APUA), envisages providing training on EVs and energy storage .

The United Nations Economic Commission for Africa (UNECA) and its partners have launched an initiative to promote the development of electric vehicles (EVs) and energy storage technologies in Africa. The initiative, jointly launched by the UNECA in partnership with the Global Energy Interconnection.

Energy storage allows for the increased use of wind and solar power, which can not only increase access to power in developing countries, but also increase the resilience of energy systems, improve grid reliability, stability, and power quality, essential to promoting the productive uses of energy.

Baku, Azerbaijan – 15 November 2024: In a crucial step towards securing a sustainable and energy-efficient future for the African continent, the African Union (AU) launched the African Energy Efficiency Programme and the African Energy Efficiency Alliance at COP 29 in Baku, Azerbaijan. The.

More than 600 million people in Sub-Saharan Africa are living without electricity according to World Bank research. While countries in the African continent are committed to achieving SDG7 which is ensuring access to affordable, reliable, sustainable, and modern energy for all by 2030, various.

Across Sub-Saharan Africa, new solar and wind installations are coming online in villages, towns and industrial corridors once reliant on diesel and long transmission lines. But the way we think about energy storage in the context of specific projects still isn't evolving fast enough. Too often.

The Africa Energy Program partners with governments, development partners, utilities, and the private sector in sub-Saharan Africa to drive deployment of affordable, efficient, reliable, and resilient energy systems that incorporate distributed energy resources to rapidly provide energy access and.
