

## A-Core Container

# Albanian lithium iron phosphate portable energy storage power supply manufacturer

## Overview

---

Will Albania build its first lithium ion battery plant?

Chief Executive Officer Bruno Papaj said the firm signed a memorandum of understanding with an Indian investor on the construction of Albania's first lithium ion battery plant. The facility is planned to come online within two years, with 100 MW in annual capacity.

Does Albania have a hydropower plant?

Hydropower makes up almost the entire domestic output in Albania, which helps balancing to a point, but it has no pumped storage hydropower plants. Furthermore, the country is exposed to drought and often turns to emergency imports.

What is a lithium iron phosphate battery?

Lithium Iron Phosphate batteries have high power density when compared to other LIBs. This allows the LFP battery to charge and discharge currents along with an increased pulse load capacity. With higher currents, LFP cells can be charged quickly but constant rapid charging shortens the lifespan of this battery.
