Albanian rooftop solar panels

Overview

Does Albania have a solar PV potential?

Explore the solar photovoltaic (PV) potential across 6 locations in Albania, from Tirana to Vlorë. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

Is solar a viable alternative to electricity in Albania?

A move toward more solar is partly an attempt to diversify Albania's electricity sources. In "Evaluation and integration of photovoltaic (PV) systems in Albanian energy landscape," which was recently published in Solar Compass, the scientists said that solar is an adaptable and affordable alternative, given Albania's sunny climate.

What is the ideal angle to tilt solar PV panels in Albania?

So far based on Solar PV Analysis of 6 locations in Albania, we've discovered that the ideal angle to tilt solar PV panels in Albania varies between 35° from the horizontal plane facing South in Tirana and 34° from the horizontal plane facing South in Vlorë.

Could solar power reduce Albania's reliance on energy imports?

Albanian researchers say that solar could be key to reducing Albania's reliance on energy imports, but the nation will need to invest in grid infrastructure, streamline laws, and enhance access to funding to support deployment.

Where is Albania's second largest photovoltaic plant?

The company laid the cornerstone late last year for the 100 MW solar power system in the west of Albania. The site is near the port city of Durrës. One other PV plant is planned for expansion to 100 MW. Now another project of the same size is racing for the position of the country's second-largest photovoltaic facility.

Can Albania expand its solar power capacity?

Most solar power plants in Albania are small-scale installations, generally with capacities of less than 5 MW. This limited scale of deployment underscores the opportunity for Albania to expand its solar capacity significantly, particularly as the country relies heavily on imported fossil fuels to meet its energy needs.
