Find hydrogen fueling stations in the United States and Canada. For Canadian stations in French, see Natural Resources Canada. An unexpected error occurred. Please try again or contact us for assistance. These stations are only available to a certain subset of customers. Need project assistance?

.

The U.S. hydrogen fueling landscape is pretty sparse, with just 74 stations nationwide. California, naturally, hogs most of them – 54 retail locations. The rest?

Scattered like breadcrumbs across seven states, with Hawaii managing two stations and others settling for one each. Michigan and Ohio.

Our interactive map shows real-time data on the locations of hydrogen stations, ensuring that you can find the nearest refuelling point with ease. Whether you are planning a cross-country journey or simply need a local refill, our comprehensive directory includes up-to-date information on station.

Hydrogen refueling stations in the United States have undergone a significant evolution from the opening of the first station to the present day. The first hydrogen station open to the public in the United States opened in November 2004 in Washington, D.C. The station, operated by Shell, marked the.

Your Trusted Source for Hydrogen Analysis Data, Guidelines, and Tools
Existing and planned hydrogen fueling stations in the U.S. are available to view on a map or download as a spreadsheet from the Alternative Fuels Data

Center. The site includes information regarding location, accessibility, hours.

Hydrogen as an alternative energy source is most commonly used in hydrogen fuel cells, which power hydrogen fuel cell electric vehicles (FCEVs) among many other use cases. Vehicles and other machines that use these cells require hydrogen fueling stations to replenish them, much like their gasoline-.
