Argentina communication base station EMS construction

Overview

When did China start constructing a Chinese satellite station in Argentina?

Argentina's Congress did not approve the station until February 2015. However, construction had already begun in 2013, and it was completed in 2017. The base, which China controls through a 50-year lease, stands on a 200-hectare plot and comprises a 16-story antenna.

Does Argentina have a 'space station' built on Argentine soil?

Argentina's effort to distance itself from China is becoming increasingly evident. It is now serious about conducting a formal inspection of a Chinese "space station" built on Argentine soil.

Does Argentina have a space station?

During an interview, Susana Malcorra, who served as Argentina's foreign minister from 2015 to 2017, emphasized that Argentina lacked physical oversight of the station's operations. In 2016, she revised the China space station deal to specify that it should only be used for civilian purposes.

Where is the Chinese space station in Argentina?

The Chinese "space station," located 18 miles from the village of Bajada del Agrio in Argentina's southwestern province of Neuquén, was established in 2014 through an agreement between China and the administration of then-President Cristina Fernández de Kirchner. Argentina's Congress did not approve the station until February 2015.

Will Argentina be able to access 10 percent of antenna time?

Construction was finished in February 2017, during the government of former president Mauricio Macri and it was agreed that Argentina could access 10 percent of the antenna time to develop projects and improve regional and international cooperation. Milei's government is expected to focus on this point to assess compliance.

Why is Argentine infrastructure a problem?

As a geographically large country with widely distributed population centers, Argentina has substantial needs to increase and improve infrastructure. A major constraint is a lack of investment in and financing of such large projects. The Argentine government plays a prominent role in the infrastructure sector.
