# Bangladesh grid-side energy storage power station trading rules

## Overview

---

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

Is energy storage regulated in Bangladesh?

For example, the Bangladesh Energy Regulatory Commission (BERC) Licensing Regulations 2006 do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deployment of such projects is well established in the country.

How to improve grid stability & safety?

Integration of renewable sources.10.1.4 Ensure adequate protection mechanism at both plant level and network level for grid stability and safety.10.1.5 Facilitate regional mixed power generation by sharing renewable and conventional sources of energy.10.1.6 Implement effective energy storage technologies for grid stability at strategic.

How does the power sector support transport in Bangla-Desh?

The power sector continues to support the ongoing electrification of transport in Bangladesh, through various initiatives undertaken by distribution companies and the roll-out of an EV charging tariff.

What is an example of a grid connected battery energy storage system?

For example, grid connected Battery Energy Storage Systems (BESS) used to offset peaking power plants and in load management applications. Short-High Scenario: This scenario requires high level of interventions and development partner support.

How much energy storage does Bangla-Desh need?

120GW of RE generation. If a similar ra-tio were to be considered for Bangla-desh's short-term RE aspirations (~1GW in the next three years), the re-sulting energy storage requirements would amount to 250MW/ 500MWh of energy storage.
