

## **A-Core Container**

# **Base station energy management system computer room**

## Overview

---

What are energy management systems (EMS)?

Energy Management Systems (EMS) play an increasingly vital role in modern power systems, especially as energy storage solutions and distributed resources continue to expand.

What are energy management systems?

The primary goals are reducing energy bills (by peak shaving), providing backup power, and ensuring swift adjustments to changing load requirements. Energy Management Systems provide the backbone for modern energy storage solutions, uniting hardware and software components into a cohesive whole.

What is GPM Energy Management System (EMS)?

GPM's Energy Management System (EMS) controls power absorption and injection, maintaining the operational efficiency of the BESS, and offering customizable real-time control and seamless integration with GPM SCADA and GPM PPC systems as well as third-party systems.
