Base station wind power module replacement

Overview

Do I need wind turbine repair or full-on component replacement?

But, a few factors can influence whether you need wind turbine repair or full-on component replacement. Wind turbines are complex, high-voltage machines that transform wind power into electricity. As such, wind turbines are at the mercy of Mother Nature. Weather-related pitch system failures could affect:.

Is PSI the leading ISP for wind turbine repairs?

PSI is the leading ISP for wind turbine repairs, with a comprehensive experience and a milestone of over 40,000 wind turbine components repaired as of May 2019.

What is a line replaceable wind turbine?

Sometimes it comes down to replacing a component or abandoning the tower. Modular component design makes replacement easier and less risky. The industry calls this a line replaceable unit. Wind farmers can make their own replacements with simple instructions and very little time.

Does EDF power solutions repair wind turbines?

Unleash the full potential of your wind fleet with our expert Major Correctives Team. EDF power solutions specializes in repairing and replacing major components in wind turbines across the US and Canada, offering a comprehensive range of services to address all your repair needs.

Should you replace your wind turbine parts?

A myth about component replacement is that buying new parts every time something breaks saves money in the long run because the turbine will run more efficiently with new parts. That belief is false! Wind turbine repair is often cheaper than a full rebuild, obviously, and it doesn't affect functionality.

What is repowering a wind turbine?

Repowering wind turbines is a tricky business because there's a lot of technical challenges involved. Repowering a turbine is essentially asking an old tower section to do the work of a new one. There is some heavy lifting to be done from an engineering standpoint to ensure this can be done in a safe and cost effective manner.
