Battery cabinet installation spacing

Overview

The UL 9540A testing shows that the manufacturers installation and spacing recommendations included in these products' Quick Installation Guides (QIG) are adequate and allow a separation distance less than 3 ft. How far apart should IQ batteries be stacked?

Enphase IQ Battery 3, 3T, 10, and 10T test was conducted at the manufacturers recommended mounting distances with a minimum of 6" between vertically stacked units, 1" horizontally between IQ Battery 3/3T, and 6" clearance on the sides for IQ Battery 10/10T. The IQ Battery datasheets detail that they have been certified to UL9540A.

How far apart should storage units be positioned?

Therefore, if you install multiple storage units, you have to space them three feet apart unless the manufacturer has already done large-scale fire testing and can prove closer spacing will not cause fire to propagate between adjacent units.

What is the standard for installation of stationary energy storage systems?

"Standard for the Installation of Stationary Energy Storage Systems." CFC Section 1206.2.8.3 Stationary Battery Arrays Stationary battery arrays shall be spaced not less than 3 ft from other stationary battery arrays.

How far from the ceiling should IQ battery 10T be installed?

The IQ Battery 10T must be installed at least 3 ft from the ceiling. The IQ Battery 10T must be installed at least 6 inches from the floor. This spacing is also permitted with IQ Battery 3T and 10T if the IQ Battery 10T is installed using second-generation wall mount parts that are UL 9540A compliant.

Can IQ batteries be installed on a wall?

This spacing is also permitted with IQ Battery 3T and 10T if the IQ Battery 10T is installed using second-generation wall mount parts that are UL 9540A

compliant. This spacing is also permitted with IQ Battery 10T if installed using second-generation wall mount parts that are UL 9540A compliant.

What is the minimum space for non-battery Enphase equipment?

The minimum space for non-battery Enphase equipment is 6" around all sides. For first-generation wall mounts that are not UL 9540A compliant. The IQ Battery 10T must be installed at least 3 ft from the ceiling. The IQ Battery 10T must be installed at least 6 inches from the floor.
