# Belgian solar power generation system

## Overview

---

Belgium plans to significantly increase its photovoltaic (PV) capacity to 33.6 GW by 2035, a key goal outlined in its draft national energy and climate plan (NECP). This ambitious plan details the country's strategies for renewable energy, energy efficiency, and climate policies.

Belgium plans to significantly increase its photovoltaic (PV) capacity to 33.6 GW by 2035, a key goal outlined in its draft national energy and climate plan (NECP). This ambitious plan details the country's strategies for renewable energy, energy efficiency, and climate policies.

Solar power in Belgium reached an installed capacity of 9.9 GW at the end of 2023, an increase of 1.8 GW from 2022. [1] Belgium had 4,254 MW of solar power generating 3,563 GWh of electricity in 2018. [2] In 2015 PV solar power accounted for around 4% of Belgium's total electricity demand, the 4th.

Continuously tracking and forecasting solar power generation enables Elia to operate its grid smoothly around the clock. Belgian electricity system operator Elia says solar was the leading source of renewable energy in Belgium's electricity mix in 2024. Total solar energy generation in the country reached new highs last year, totaling 8.3 TWh. Solar accounted for 11.9% of Belgium's electricity generation mix in 2024.

Belgium plans to significantly increase its photovoltaic (PV) capacity to 33.6 GW by 2035, a key goal outlined in its draft national energy and climate plan (NECP). This ambitious plan details the country's strategies for renewable energy, energy efficiency, and climate policies. The draft NECP.

According to GlobalData, solar PV accounted for 35% of Belgium's total installed power generation capacity and 9% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Belgium Solar PV Analysis: Market Outlook to 2035.

Belgium's rooftop solar panels have reached a total capacity of 11.4 GW, an increase of 4 GW from two years ago and 1.4 GW more than in 2024, according to Elia, the country's grid operator. This growth highlights the rising adoption of solar energy in Belgian households. Elia reported that these.
