Leveraging cumulative decades of electric market experience, Black Mountain Energy Storage develops powerful, flexible, and strategically placed battery energy storage projects to foster a resilient electric grid. BMES' quickly expanding team of energy experts are fast actors in pipeline development of utility-scale energy storage solutions.

Could mountains be used to build a battery for long-term energy storage?

A team of European scientists proposes using mountains to build a new type of battery for long-term energy storage. The intermittent nature of energy sources such as solar and wind has made it difficult to incorporate them into grids, which require a steady power supply.
