NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once.

An innovative thermal energy storage system in use at a New York state university campus is an example of the long-term energy vision for the college, and a blueprint for other institutions. Commercial and industrial enterprises increasingly find the need to make their energy systems more efficient.
