## Overview

---

Do I need a power adapter in Cuba?

If you are visiting Cuba from the United States, you should bring a power adapter because US Type A or B outlets may not be readily available. If your device runs on 110 volts or is dual voltage, and the plug fits in a Cuban power outlet, it will work without a plug adapter in Cuba.

What kind of power does Cuba use?

Cuba uses BOTH a 110 and a 220V supply voltage with a 60Hz frequency. Although most hotels in Cuba use 110V power, some of the newer hotels use 220V. The same is true in casa particulars. So bring your regular phone or laptop charger, hairdryer, or shaver to Cuba and charge them from a hotel or a casa particular wall socket.

What plugs and adapters should I bring to Cuba?

Here are some tips about plugs and adapters when you travel to Cuba: If you are visiting Cuba from the United States, you should bring a power adapter because US Type A or B outlets may not be readily available.

What type of plugs are used in Cuba?

In Cuba, flat, two-pin plugs are the most common. They are common if you're coming from the United States, Canada, and Mexico. There are also combined sockets in some accommodations where a Euro-plug can be used. However, if your devices DON'T use this type of plug, you should bring an adapter, which should be included in your packing list.

What voltage is used in Cuba?

The standard voltage and frequency in Cuba are 110V and 220 V and 60 Hz, respectively. So keep your eyes open! Yes, that's right, in Cuba, two different voltages (110 and 220 V) are used. The voltage you will encounter will vary depending on the region, city, and even the casa particular and hotel.

## Why does Cuba have a bad energy system?

Cuba's energy system also suffers from years of reliance on domestic, poor-quality heavy crude oil, which is corrosive because it's high in sulfur. This has accelerated the wear and tear on boilers, turbines, and pipes in Cuba's power plants, shortening their life spans and causing frequent and costly outages.
