# Dominican Republic energy storage project planning

## Overview

---

The ambition will be kicked off by a clean energy tender this year which the government is working on. Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by 2027 during a speech at a Caribbean energy.

The ambition will be kicked off by a clean energy tender this year which the government is working on. Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage systems (BESS) by 2027 during a speech at a Caribbean energy forum. Santos.

During the “Energy Sector Reform” Forum organized by the Dominican Association of the Electric Industry (ADIE) and the Technological Institute of Santo Domingo (INTEC), Edward Veras, executive director of the National Energy Commission (CNE), emphasized the Dominican Republic’s progress in energy.

The Dominican Republic is rapidly integrating renewable energy sources into its national grid. By 2025, they aim to achieve 25% renewable energy dependence. This ambitious goal has spurred significant growth, with renewable energy contributing nearly 19% of the country’s total energy demand in.

The Dominican Republic is making significant strides in its energy transition by emphasizing renewable energy and energy storage. With ambitious plans to achieve a 300 MW energy storage capacity by 2027, the nation aims to enhance the stability and reliability of its electricity grid, paving the.

The International Renewable Energy Agency (IRENA) supports countries in achieving their sustainable energy transition through realistic, achievable

technology and resource options. REmap – IRENA's global renewable energy roadmap – offers valuable insights on the opportunities and challenges ahead.

This project in coordination with the MEM attempts to accelerate the country's renewable energy transition and decarbonization plan by tackling the following barriers: First, there is a significant lack of knowledge and experience regarding battery storage technologies and their associated business.
