EU Energy Storage Power Station Project

Overview

Spain is poised to lead Europe in renewable energy by constructing the continent's largest pumped storage power plant. Managed by Iberdrola, the Conso II project in Ourense, in Galicia, will involve an investment of over 1.5 billion euros.

Spain is poised to lead Europe in renewable energy by constructing the continent's largest pumped storage power plant. Managed by Iberdrola, the Conso II project in Ourense, in Galicia, will involve an investment of over 1.5 billion euros.

Since 2020, the Commission publishes yearly progress reports on the competitiveness of clean energy technologies that present the current and projected state of play for different clean and low-carbon energy technologies and solutions. The 2025 report highlighted the urgent need to quickly deploy.

Spain is poised to lead Europe in renewable energy by constructing the continent's largest pumped storage power plant. Managed by Iberdrola, the Conso II project in Ourense, in Galicia, will involve an investment of over 1.5 billion euros. The facility will connect two reservoirs using the area's.

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status - in operation, planned and under construction -, by location and by technology. Most projects have been recorded in Germany so far. The dashboard can be filtered by country, project status.

Poland is accelerating its energy transition by investing not only in renewable energy sources, but also in technologies to ensure the stability of the power system. Construction of the country's largest battery-based electricity storage facility has started in Żarnowiec. Highlights: PGE has.

The new facility, complemented by planned solar and gas power projects on site, is poised to play a critical role in southern Germany's energy future. RWE has officially begun construction of Germany's largest battery storage facility at its Gundremmingen site in Bavaria. The facility will feature.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced.
