# EU Energy Storage Projects 2025

## Overview

---

How much energy storage will Europe have in 2020?

In 2020, the European storage capacity amounted to 40 GW. Those are not binding targets, Ease said. The European Commission's proposal to update the EU's renewables directive, which also includes energy storage technologies, is expected on 14 July as part of its Fit for 55 package.

How many energy storage projects are there in Europe?

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology. It lists 32 countries and is led by Germany, with 472 projects. It is followed by the United Kingdom (455 projects), Spain (147 projects) and Italy (112 projects).

When is energy storage Europe 2023?

Review ENERGY STORAGE EUROPE. ENERGY STORAGE EUROPE is happening the 28th, 29th and 30th of November 2023 at Messe Düsseldorf in Düsseldorf (Allemagne). ENERGY STORAGE EUROPE is the location, where you can also link your business with the specialist world and in this way ensure good prospects of success.

What percentage of Europe's energy storage capacity is pumped hydro?

However, despite an exponential growth in Europe's battery energy storage capacity, which reached 36 gigawatt-hours in 2023, pumped hydro still accounted for 90 percent of the electricity storage capacity in the European Union that year.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the

first of its kind at European level to show all forms of clean energy storage solutions.

How many energy projects are there in the EU?

Today, over 1,900 projects exist across the EU involving over 1,250,000 EU citizens. Leading examples can be found in many countries including Sifnos in Greece, Hvide Sande in Denmark, and Ecco in Belgium. In 2019, as part of Horizon 2020, the EU began developing a policy framework to foster the operation of these energy communities.
