Energy storage cabinet battery prices in 2024

Overview

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024. How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

What do we expect in the energy storage industry this year?

This report highlights the most noteworthy developments we expect in the energy storage industry this year. Prices: Both lithium-ion battery pack and energy storage system prices are expected to fall again in 2024.

Will lithium-ion battery prices fall again in 2024?

Prices: Both lithium-ion battery pack and energy storage system prices are expected to fall again in 2024. Rapid growth of battery manufacturing has outpaced demand, which is leading to significant downward pricing pressure as battery makers try to recoup investment and reduce losses tied to underutilization of their plants.

How will battery overproduction and overcapacity affect the energy storage industry?

Photographer: Krisztian Bocsi/Bloomberg Battery overproduction and overcapacity will shape market dynamics of the energy storage sector in 2024, pressuring prices and providing headwinds for stationary energy storage deployments. This report highlights the most noteworthy developments we expect in the energy storage industry this year.

How many gigawatts will stationary storage add in 2024?

Stationary storage additions should reach another record, at 57 gigawatts (136 gigawatt-hours) in 2024, up 40% relative to 2023 in gigawatt terms. We expect stationary storage project durations to grow as use-cases evolve to deliver more energy, and more homes to add batteries to their new solar installations.

Will stationary storage projects grow in 2024?

We expect stationary storage project durations to grow as use-cases evolve to deliver more energy, and more homes to add batteries to their new solar installations. EV sales are headed for another record year in 2024 (though there is some caution with US and Europe market slowdown).
