Energy storage power station launched

Overview

China has made breakthroughs on compressed air energy storage, as the world's largest of such power station has achieved its first grid connection and power generation in China's Shandong province.

China has made breakthroughs on compressed air energy storage, as the world's largest of such power station has achieved its first grid connection and power generation in China's Shandong province.

Constellation Energy began making its case Tuesday that it should be the go-to company if Maryland expands power generation within its borders. The company said Tuesday that it had submitted proposals, under the state's new permitting fast-track process, for two natural gas power plant concepts and.
