European Energy Storage Projects

Overview

The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets in over 29 countries, it is the largest and most detailed archive of European storage.

The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets in over 29 countries, it is the largest and most detailed archive of European storage.

Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. Wood Mackenzie Limited, subject to any additional data modifications and/or input provided by the EC or any of its authorised 3rd party contributor. Dive into the map of Energy.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced.

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status – in operation, planned and under construction –, by location and by technology. Most projects have been recorded in Germany so far. The dashboard can be filtered by country, project status.

The ninth edition of the European Market Monitor on Energy Storage (EMMES) by the European Association for Storage of Energy (EASE) and LCP Delta, is now available, highlighting Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024. The report also.

The European Commission officially introduced the “European Energy Storage Inventory” at the beginning of March 2025-a pioneering real-time dashboard, which for the first time enables a comprehensive and transparent overview of the energy storage landscape in Europe. This innovative tool.
