Fiji Communication Base Station Hybrid Energy Assets

Overview

How can Fiji meet its energy needs?

In line with this plan, assessments have shown that a combination of solar, wind, geothermal, marine, biomass, and biofuel could be used to meet Fiji's energy needs. Currently, as much as 40 percent of Fiji's power is generated from diesel and heavy fuel oil, which is purchased via local companies from Singapore-based suppliers.

How can Fiji provide universal electricity access?

Fiji aims to provide universal electricity access through the Fiji Rural Electrification Fund. This goal requires significant investment in: Decentralised solar and mini-grid systems. Micro-hydropower projects for remote communities. Energy storage solutions to enhance reliability.

How does Fiji ensure long-term energy security?

The Fijian Government seeks to ensure Fiji's long-term energy security by increasing the availability of data and information required to support investments designed to increase the reliability and resilience of the national energy infrastructure.

How does Fiji generate electricity?

Close to 60 percent of Fiji's electricity generation is derived from hydropower, while remote areas and outer islands are dependent on imported fossil fuels and biomass. Fiji's 20-year National Development Plan calls for all power to be generated from renewable sources by 2030.

What is Fiji's energy policy?

Fiji's Electricity Act: Oversees electricity generation, distribution, and pricing. National Energy Policy: Focuses on energy access, renewable integration, and energy security. Public-Private Partnerships (PPPs): Encourage collaboration in energy infrastructure projects, particularly in renewable energy.

What is Fiji's energy mix?

Fiji's energy mix is diverse, though it is still transitioning away from a reliance on imported fossil fuels. The primary sources of energy include: Hydropower: A major contributor to Fiji's renewable energy capacity, hydropower accounts for approximately 50% of the country's electricity generation.
