Georgia Wind-Solar Energy Storage Power Station Project

Overview

Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

How many battery energy storage sites are there in Georgia?

Construction is underway at four new battery energy storage system sites located across Georgia, including one in Bibb County totaling 765 megawatts of power, Georgia Power announced Wednesday in a news release. The 128 megawatt BESS site in Bibb County follows the state's first ever BESS site near Columbus, which entered service in 2024.

Will Georgia Power offer more battery energy storage projects?

In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future. Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

What do we know about Georgia Power Projects?

Georgia Power included attachments with information and data on each of the proposed projects, but since they contained "sensitive terms and conditions" and cost information, they were nearly entirely redacted from public

disclosure- deemed “trade secrets.” Here’s what we do know about those projects:.

How many MW of new battery energy storage will be available?

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in development at Fort Stewart Army Installation near Savannah, Georgia.
