# German energy storage cabinet exports

## Overview

---

Which energy storage system is most popular in Germany?

**Residential ESS Continues to Lead in Germany's Energy Storage Landscape**  
Residential energy storage systems (ESS) maintained their stronghold as the most prevalent installation type in Europe throughout 2023. According to TrendForce data, Germany's energy storage sector predominantly saw the adoption of residential storage solutions.

Is Germany a good place to invest in energy storage?

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing industry. The country stands out as a unique market, development platform and export hub.

Why do we need energy storage systems in Germany?

Increasing the share of renewables poses new challenges: Excess energy produced during off-peak hours needs to be stored and made available when needed. Since energy storage systems (ESS) can balance supply and demand, they are an essential part of Germany's energy transition. In line with this, the market for ESS is constantly growing.

What percentage of Germany's energy storage installations surpassed 5gwh?

Specifically, new installations of residential storage surpassed 5GWh, capturing a substantial 83% share, followed by utility-scale energy storage and commercial & industrial (C&I) storage, which accounted for 15% and 2% respectively. Proportion of Germany's Installations Types.

Which countries have the most energy storage installations in Europe?

Germany, the United Kingdom, and Italy maintained their positions as the top three markets for energy storage installations in Europe during 2023. As per statistics from TrendForce, Germany, the UK, and Italy added 6.1 GWh, 4.0

GWh, and 3.9 GWh of installations, respectively, during the year.

How much does Germany spend on EV and stationary battery research?

Public research and development incentives for EV and stationary battery research amount to between EUR 80 million and EUR 85 million every year. As the European lead market in the energy transition age, Germany provides the opportunity for companies to develop, test, define and market new energy storage solutions.
