# How much does a UK energy storage battery cost

Overview

Typical installed battery cost: £5,000–£8,000 (higher for >10 kWh). 0% VAT on installs until 31 March 2027. Best value if you have solar PV, use a smart time-of-use tariff, and/or run an EV or heat pump. Realistic payback: ~ 6–12 years with PV and smart tariffs; longer without either.
