The presentation will give attention to the requirements on using windenergy as an energy source for powering mobile phone base stations.

How much does wind energy cost?

Lower installation costs lead to energy produced at a lower cost, with the average levelized cost of energy for utility-scale wind power down to \$32/MW-hours in 2021. The U.S. wind industry installed 13,413 megawatts (MW) of new wind capacity in 2021, bringing the cumulative total to 135,886 MW.

Lower installation costs lead to energy produced at a lower cost, with the average levelized cost of energy for utility-scale wind power down to \$32/MW-hours in 2021.

How much does it cost to build a wind farm?

Average construction costs for wind farms with 1 MW to 100 MW of capacity decreased by 22% to \$1,949/kW in 2021. The average construction cost for

natural gas-fired generators fell 18% between 2020 and 2021. The decrease in average cost for natural gas-fired generators was driven primarily by decreases in the cost for combustion turbines.
