How much is the hybrid power supply for Namibia s green base station

Overview

Who owns the electricity market in Namibia?

Traditionally, the Namibian electricity market has been dominated by the state-owned utility Namibia Power Corporation (Pty) Ltd., or NamPower for short. In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer.

What does NamPower do in the Namibian electricity market?

In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer. For some years now, the Namibian government has been attempting to liberalise the market with a view to creating.

Where does Namibia get its electricity from?

As a result, Namibia remains dependent on electricity imports from neighbouring countries, which met about 60% of total demand in 2020. The majority of electricity imports are sourced from South Africa.

Can Namibia produce green hydrogen?

Namibia would like to position itself internationally as a production location for green hydrogen due to its very good renewable energy potential. Model calculations assume that green hydrogen can be produced for 25 to 33 NAD (ca. 1.50 to 2 Euro) per kilogram in Namibia.

How much power does Namibia need?

Peak demand is over 600 MW. Namibia has long relied on imported power from South Africa (Eskom) and other neighboring countries, but South Africa's own economy has put strains on its domestic electricity generation capability and thus its ability to export. Namibia has a power purchase agreement with Eskom which expires in 2025.

What is Namibia doing with green energy?

Namibia plans to establish an integrated, thriving, green ecosystem across southern Africa. Shared green energy infrastructure will unlock new synergies, and Namibia will use green energy to further existing manufacturing, mining and minerals processing industries.
