How to make money with energy storage power plants in Asia

Overview

Why did Energy Storage Summit Asia move from Singapore to Manila?

Returning for its third edition in 2025, the Energy Storage Summit Asia relocated from Singapore to Manila, in the Philippines. This shift reflects the country's emergence as a leader in energy storage deployment following the inaugural Green Energy Auction 4- the first auction to integrate Renewable Energy and Energy Storage Systems (IRESS).

Should Philippine energy storage systems be regulated?

The Philippines needs to establish clearly defined rules for the market participation of energy storage systems (ESS), the chair of the country's regulator has said. A renewable energy subsidiary of oil & gas company Reservoir Link has agreed to jointly develop the first dispatchable solar PV power plant in Malaysia.

Can companies recover investment in DC energy storage?

Chang Jae Won of the Korea Smart Grid Association believes companies lack a model for recovering their investment in DC energy storage. The Philippines has commissioned the Batangas 1 project, the country's first to combine agriPV with a battery energy storage system (BESS).
