# Huawei Power Investment Energy Storage Project

## Overview

---

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality. Global technology giant Huawei is at the helm of this groundbreaking venture.

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality. Global technology giant Huawei is at the helm of this groundbreaking venture.

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. Saudi Arabia's Red Sea Project is making headlines with the construction of the world's largest photovoltaic-energy storage microgrid. Featuring a 400MW solar PV system coupled with.

Huawei invests approximately \$1.22 billion in energy storage projects annually, making it a front-runner in the sector, 2. This company's commitment is fueled by the growing demand for renewable energy solutions and storage technologies, 3. Their innovative approaches and strategic partnerships.

Huawei Digital Power has announced the signing of a key contract with SEPCOIII for its NEOM Red Sea project, which involves 400 MW of PV plus a 1300 MWh battery energy storage solution (BESS), currently the world's largest energy storage project. This 1300 MWh off-grid energy storage.

- GoldenPeaks Capital and Huawei sign a strategic MoU to deploy 500MWh of grid-forming battery energy storage systems (BESS) across Central and Eastern Europe.
- Partnership strengthens grid stability amid rising renewable integration, aligning with EU carbon neutrality and energy resilience goals.
