# Hydrogen power supply for 5G base stations in the Netherlands

## Overview

---

What are the major hydrogen stations in the Netherlands?

Zwolle: Holthausen Energy Points is working on a station that will serve as a key hub for the north of the Netherlands. Major hydrogen station operators in the Netherlands include: Air Liquide: Air Liquide has been a pioneer in hydrogen infrastructure in the Netherlands, with the Rhoon station being the first to open to the public.

How many hydrogen filling stations are there in the Netherlands?

Three hydrogen filling stations of OG Clean Fuels are operational in Assen (FOS), The Hague (HRS) and Amsterdam (HRS). In the next two years, subject to permits and subsidies, 10 fastfill stations will - be added in The Netherlands. Contact: info@orangegas.nl Project period: 2019 - 2023 Category: end use: mobility & transport.

Will Gasunie build a national transport network for hydrogen?

Today, Dutch Minister for Climate and Energy Rob Jetten announced new plans for the construction of a national transport network for hydrogen. Gasunie will develop the hydrogen network in the Netherlands in the coming years, after which it will assume the role of TSO (Transmission System Operator).

What is the Netherlands doing to fuel a green hydrogen future?

The Netherlands: Fueling a green hydrogen future. Known as the living lab for hydrogen worldwide, the Dutch are developing, innovating and validating this green energy. As a hub for global energy, the Netherlands takes a proactive approach in accelerating the world's green energy transition.

What are the current hydrogen projects in Rotterdam?

Take a look at current hydrogen projects in the port of Rotterdam. Renewable energy is being generated at scale on the North Sea. Extensive new electrical infrastructure will feed multiple electrolysers, converting this clean power to

hydrogen. Emissions from hydrogen produced from natural gas will be captured and stored deep under the North Sea.

How will the government support sustainable hydrogen in the Netherlands?

The cabinet of Netherlands is providing more than €700 million in subsidies to companies that will produce sustainable hydrogen in the Netherlands. With this, the cabinet will accelerate the development of sustainable hydrogen in the Netherlands.
