

## A-Core Container

# India s mobile energy storage site wind power hybrid power source

## Overview

---

India plans to develop a 13 GW hybrid renewable energy park in Ladakh, spanning solar, wind and battery storage systems across Pang, Debring and Kharnak. No developers have been selected yet, while state agencies move ahead with supporting transmission and pilot.

India plans to develop a 13 GW hybrid renewable energy park in Ladakh, spanning solar, wind and battery storage systems across Pang, Debring and Kharnak. No developers have been selected yet, while state agencies move ahead with supporting transmission and pilot.

Zelestra India's commercial & industrial (C&I) portfolio has reached 122.4 MWp through wind-solar-battery energy storage system (BESS) hybrid projects in Tamil Nadu. Zelestra, a multi-technology renewable energy developer, today announced that its commercial & industrial (C&I) portfolio in India.

India plans to develop a 13 GW hybrid renewable energy park in Ladakh, spanning solar, wind and battery storage systems across Pang, Debring and Kharnak. No developers have been selected yet, while state agencies move ahead with supporting transmission and pilot storage projects. A hybrid renewable.

In the last 10 years, India has focused on adding 500 gigawatt (GW) of renewable energy capacity, but one main concern has been lower productivity from renewables and the inability to provide adequate power during peak hour demand India successfully met an all-time maximum power demand of 250 GW.

India's hybrid power market is expanding, driven by rising energy demands and grid instability, crucial in off-grid areas. Hybrid systems blend renewables with diesel/battery backups for reliability, targeting telecom, mining, and rural electrification. Solar-wind-battery models gain traction.

Apollo Green Energy's hybrid energy systems integrate solar, wind, and storage technologies/ solutions, providing a consistent, reliable energy mix that stabilizes India's power grid. Apollo Green Energy is at the forefront of

India's solar/ wind/ storage sector, developing large-scale energy forms.

Solar Power\* (Cumulative) : 127.33 GW ^50.11 GW includes 6685.6 MW  
Pumped Storage # Excluding Nuclear Capacity of 100 MW, which is under  
outage for very long time, and have been removed temporarily w.e.f.
