Iran 5G base station for communications in 2025

Overview

Does Iran have a 5G mobile phone status quo?

Referring to the report of 5G mobile phones status quo in Iran, Irancell CEO stated that “the 5G project in Iran was initiated by Irancell as a pilot test in 1395 in a laboratory and finally in 1399, with the cooperation of ICT Research Center, the first commercial 5G site was launched in the country.

Is Iran a good place to invest in 5G?

There has also been investment in 5G, though the development of this sector has been hampered by the paucity of available spectrum. To address this, the government planned imminently to release spectrum in the 3.7-3.8GHz range for 5G. From a broad perspective, Iran offers significant opportunities for growth in the telecoms sector.

How many 5G sites are there?

Recently, concurrent with Irancell’s 17th anniversary, we managed to increase the number of our 5G sites to 650 which is now close to 700 sites nationwide. There are about 6 million subscribers having mobile phones supporting 5G from whom 6000 subscribers have experienced this generation of communications.

Is Iran a good place to invest in telecoms?

From a broad perspective, Iran offers significant opportunities for growth in the telecoms sector. The country has one of the largest populations in the Middle East, and there is a high proportion of youthful, tech savvy users having considerable demand for both fixed and mobile telecom services.
