Ireland s large-capacity energy storage battery

Overview

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

Cornwall Insight calculates that Ireland's battery storage capacity will reach 13.5 GWh by 2030, up from 2.7 GWh in 2025. Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide secure, affordable, clean power to thousands of homes when the sun isn't shining and the wind isn't blowing. The report.

The Single Electricity Market (SEM) in Ireland is set to see a battery energy storage system (BESS) boom into 2030, with short-to-medium duration capacity forecast by Cornwall Insight to increase fivefold by 2030. This surge in battery storage expansion is likely to kickstart more investment in.

“Energy storage like this major battery plant at the ESB’s flagship site in Poolbeg will be a core part of Ireland’s new renewable energy transition,” Eamon Ryan said. Eamon Ryan (centre) cuts the ribbon to inaugurate the 75MW/150MWh Poolbeg BESS, flanked by ESB’s Jim Dollard (left) and Fluence’s.
