# Is it safe to bring an outdoor power bank to Australia

## Overview

---

Damaged (e.g. swollen) or defective lithium batteries and power banks pose significant safety risks and are forbidden to be carried. No more than 20 spare batteries in total, for personal use, are permitted per passenger.

Damaged (e.g. swollen) or defective lithium batteries and power banks pose significant safety risks and are forbidden to be carried. No more than 20 spare batteries in total, for personal use, are permitted per passenger.

Most of us carry a power bank when we travel. It just makes sense—phones don't always last a full day, especially when you're stuck at the airport or in the air. But when you're flying within Australia, there are a few things to check before you throw it in your bag. Can you take it through.

A reliable power bank is a must-have—but not all chargers are airline-friendly. Here's what you need to know about flying with power banks in Australia, plus a top pick for hassle-free travel charging. [Advanced Image Recognition Technology for Outdoor Security Reading](#) [The Ultimate Guide to Flying](#).

According to Australia's Civil Aviation Safety Authority, the average passenger travels with at least four rechargeable lithium battery devices. These batteries are popular for their compact power, but that energy density comes with a trade-off—they can overheat, catch fire, or even explode under.

The good news: yes, you can fly with a power bank, but there are rules to follow. This guide covers everything you need to know before packing your bag, including limits, safety tips, and how Pulse Charge power banks fit into airline regulations. [Why are there restrictions on power banks?](#)

Power.

But changes are coming to the rules for portable power banks to charge your mobile on board planes. Most airlines have had a long-standing rule that you must pack them in your hand luggage, but now more regulations are being introduced for carry-on as well. [READ MORE: 'Overly punishing' fee.](#)

In Australia, you can bring power banks on a plane, but they must go in your carry-on baggage. Make sure the capacity is below 100 watt-hours. For more information on safety and travel regulations, visit the CASA website or watch their safety video about lithium batteries. Travelers should also be.
