Is there an export tariff on energy storage batteries from Vietnam

Overview

Why is Vietnam introducing a battery storage tariff?

By incorporating battery storage into the tariff structure and providing higher maximums for facilities with BESS, the government is attempting to address the technical limitations that have accompanied Vietnam's rapid solar expansion in recent years.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

What is the tariff rate for imports from Vietnam?

The current tariff rate for imports from Vietnam is 20%. However, this rate can vary depending on the specific product category and any applicable trade agreements or exceptions. How do Vietnam tariffs affect import costs?

Vietnam tariffs directly increase the cost of importing goods by 20% of the product value.

How does Vietnam's export tariff structure affect the electronics industry?

The export tariff structure implemented in 2025 creates a tiered system that particularly impacts Vietnam's most successful export sectors. The electronics industry faces the largest absolute impact, with an estimated \$15.2 billion reduction in export revenue potential.
