Japanese pure sine wave 50kw inverter

Overview

What is pure sine wave inverter?

Pure Sine Wave Inverter is one of the most recognizable technologies that has been utilized by both industrial and private sectors in Distributed Power Generation (DG) Systems . DG Systems are normally assisted by Photovoltaic (PV) systems and fuel cells on small scale .

What is a pure sine wave output?

Pure sine wave output. With a good dynamic response of less than 50MS, the waveform distortion rate is smaller, with higher conversion efficiency and stable output voltage. Adopts a black pure aluminum radiator, which confirms the best radiating performance. Powerful data display function.

What is a high power 50kW grid tie solar inverter?

High power 50kW grid tie solar inverter converts 200-820V DC to 3 phase 380 volt, 460 volt and feed the power into the grid, high reliability due to perfect protection function, powerful communication interfaces, easy operation and installation.

What is the cooling method of 50 kW on grid inverter?

The cooling method of 50 kw on grid inverter is cooling fan. And strong IP65 protection, completed sealed cover of 3 phase grid connected inverter suitable for harsh environment.

Japanese pure sine wave 50kw inverter
