Laos telecommunication base station wind and solar complementary bidding

Overview

Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

Are electricity exports a key part of Laos' development strategy?

Electricity exports have formed a key part of the development strategy of landlocked Laos. PHOTO: REUTERS BEIJING - Laos has signed a US\$1.45 billion (S\$1.94 billion) clean energy deal with a Chinese power plant equipment manufacturer as the South-east Asian country furthers its push into clean power generation and transmission.

How does CGN contribute to Laos' economic development?

In addition to contributing to Laos' economic development, CGN is committed to sharing the benefits with local communities. CGN has implemented initiatives such as vocational training, educational support, community building, medical assistance, and agricultural aid to address urgent local needs and improve living standards.

How much electricity does Laos produce?

REUTERS Join ST's Telegram channel and get the latest breaking news delivered to you. Laos has produced about 80% of its electricity from hydropower over the last decade. Read more at [straitstimes.com](https://www.straitstimes.com).
