

A-Core Container

Madagascar lithium batteries for energy storage

LiFePO₄ Battery, safety

Wide temperature: -20~55°C

Modular design, easy to expand

The heating function is optional

Intelligent BMS

Cycle Life: ≥ 6000

Warranty: 10 years

Overview

In Q3 2023, Madagascar's Ministry of Energy announced a phased prohibition on large-scale lithium battery energy storage installations. The decision impacts: The ban stems from multiple incidents of improper battery disposal contaminating protected ecosystems.
