Overview

Madagascar uses 127V/220V voltage, 50Hz frequency, plug types: C D E K
Will my power plugs work in Madagascar?

What is the voltage in Madagascar?

Just like in many former French colonies, the voltage in Madagascar is 230 volts and the frequency is 50 Hz. [Click here](#) for a global map showing the spread of the different plug types used around the world. [Click here](#) for a detailed list of the countries of the world with their respective plug and outlet types, voltage and frequency.

What type of plugs are used in Madagascar?

In Madagascar, types C and E are the official standards. Since type F plugs are identical to type E plugs, they can also be used with type E sockets. Madagascar has standardized on the same plugs and receptacles as France, just like almost all other former French colonies. What is the mains voltage in Madagascar?

.

What will prirtem-1 do for Madagascar?

PRIITEM-1 will enhance the development and integration of renewable energy at a lower cost and render power supply more reliable in Madagascar's two largest cities, in addition to providing access to power in a rural area with high agro-industrial and mining potential.

What do Madagascar electrical outlets look like?

When you are going on a trip to Madagascar, be sure to pack the appropriate travel plug adapter that fits the local sockets. But what do those electrical outlets look like?

In Madagascar, types C and E are the official standards. Since type F plugs

are identical to type E plugs, they can also be used with type E sockets.

How can The GoM lift Madagascar out of poverty?

Access to energy is a cornerstone of the GOM's efforts to lift Madagascar out of poverty. The objective is to double energy production within 5 years, increase access to electricity for at least 70 percent of the population by 2030, improve reliability of supply, and reduce energy prices.

Why should Madagascar upgrade its hydropower?

By upgrading its hydropower, Madagascar will also reduce its dependence on fossil fuels, the import costs of which have a significant impact on the economy and JIRAMA's financial viability. The project will be implemented over 48 months, with the main works completed in Q4-2023.
