# Malaysia Lithium Energy Storage Power Supply Procurement Project

## Overview

---

In 2024, Malaysia launched its first large-scale storage initiative, known as MyBeST, to build four grid-connected battery systems of 100MW/400MWh each. The bidding round opened in May and closed in July, with winning projects expected to come online by 2027. How many bids are there for battery storage projects in Malaysia?

KUALA LUMPUR (Aug 21): The bidding round for four large-scale, grid-connected battery storage projects in Peninsular Malaysia has attracted significant interest, with more than 20 industry players submitting over 30 bids, according to sources. The request for proposal, known as MyBeST, closed at the end of July.

What is Malaysia's first large-scale battery project?

In 2024, Malaysia launched its first large-scale storage initiative, known as MyBeST, to build four grid-connected battery systems of 100MW/400MWh each. The bidding round opened in May and closed in July, with winning projects expected to come online by 2027.

Is Malaysia ready for energy storage?

(Photo: iStock) Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage. The country's first four large-scale grid-connected storage projects have attracted significant interest, with more than 20 companies submitting over 30 proposals.

Is Citaglobal supplying battery energy storage system (BESS) to Malaysia?

Citaglobal and Genetec Technology showcased the product at a March 2023 event attended by Malaysia's Minister of International Trade and Industry, Zafrul Tengku Aziz. Sungrow has agreed to supply battery energy storage system (BESS) technology to a large-scale project in Malaysia.

Who has bid on Malaysia's first large-scale grid-connected energy storage

project?

The first large-scale grid-connected energy storage project in Malaysia has attracted bids from over 20 companies, including Tenaga Nasional Berhad. (Image: TNB).

What is driving demand for battery storage systems in Malaysia?

The growth of solar and other intermittent renewables is driving demand for battery storage systems. (Photo: iStock) Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage.
