Mauritania communication base station wind power construction status

Overview

The power station is owned by the that is developing it and will operate it once construction is completed. The shareholders in the consortium are (a) the German conglomerate and (b) the Spanish wind turbine manufacturer . The Spanish technology conglomerate Elecnor was part of the consortium but withdrew and sold its shareholding to Siemens, in the third quarter of 2020.

What does Mauritania's new solar-wind power plant mean for the world?

Mauritania has signed its first independent power producer contract, a \$300 million agreement with Iwa Green Energy to develop a 60-megawatt hybrid solar-wind power plant. The project marks a milestone in the country's drive to expand electricity generation through private financing while accelerating its transition to renewables.

What is Mauritania's energy project?

With a planned total installed capacity of 1,200 megawatts (MW), the project will greatly promote the transformation of Mauritania's energy structure, reduce its dependence on fossil fuels, and help the country achieve green, low-carbon and sustainable development goals.

What is the next project in Mauritania?

The next project is a solar power station in the mining town of Zouerate. Boulenouar Wind Power Station is a major development project in Mauritania, aimed at providing renewable energy to the country. The power station is the largest wind power plant in Mauritania, with a capacity of 102.375 MW.

Where is a wind power project located in Mauritania?

The project is located in the scenic area around the Port of Etienne in Nouadhibou Bay, Mauritania, with its excellent geographical location and abundant wind energy resources, making it an ideal place to develop large-scale wind power projects.

What is the largest wind power plant in Mauritania?

The power station is the largest wind power plant in Mauritania, with a capacity of 102.375 MW. The wind farm consists of 39 turbines manufactured by Siemens-Gamesa, each with a capacity of 2.625 megawatts. The power station is owned by of the German conglomerate Siemens and the Spanish wind turbine manufacturer Siemens Gamesa.

Why is Mauritania a good location for wind energy production?

Mauritania is a prime location for wind energy production due to its consistent wind patterns. With wind speeds reaching 7 meters per second in the Nouadhibou region, cheap and clean electricity can be generated.
