# Mauritania energy storage project update

## Overview

---

Why should Mauritania invest in a battery energy storage facility?

The project will finance Mauritania's first large-scale battery energy storage facility, enabling the country to harness its abundant solar and wind resources for more reliable electricity. This investment is critical to the success of Mauritania's Mission 300 Energy Compact, which aims to achieve universal access to electricity by 2030.

How will Mauritania increase its energy sources?

Mauritania aims to increase and diversify its energy sources. For example, it has developed an electricity plant that will be alimented by Banda gas . This facility should produce 350 MW in 2015 and will be connected to Nouakchott and Nouadhibou. Furthermore, the plant should produce 700 MW and could export electricity to Senegal and Mali .

Will Mauritania become a leader in green energy?

"This project will position Mauritania as a leader in critical minerals, green hydrogen and energy storage, —driving job creation and expanding economic opportunities for all Mauritaniens," said Demetrios Papathanasiou, Global Director for Energy & Extractives at the World Bank.

Why should Mauritania invest in Dream?

This investment is critical to the success of Mauritania's Mission 300 Energy Compact, which aims to achieve universal access to electricity by 2030. DREAM is key to helping Mauritania estimate and promote its critical mineral potential through geological surveys.
