Maximum PV module price

Overview

This approach is intended to allow any input parameter in the model to be varied by up to a factor of two (up or down) to assess its impact on cost. All costs reported are represented two ways: Minimum Sustainable Price (MSP) and Modeled Market Price (MMP).

This approach is intended to allow any input parameter in the model to be varied by up to a factor of two (up or down) to assess its impact on cost. All costs reported are represented two ways: Minimum Sustainable Price (MSP) and Modeled Market Price (MMP).

MSP is the minimum price (with inflation adjustment) that a company can charge for its product or service in a balanced, competitive market and remain financially solvent for the long term, assuming that each of the company's input costs also represent the MSP for that cost element. MMP is the.

TOPCon 210*210mm cells will be included from June 19,2024. Prices for TOPCon cells will be based on an efficiency of 24.9%+ from August 14,2024. Prices for TOPCon cells will be based on a 25.0%+ efficiency due to production line optimization and efficiency improvement from October 23,2024. Prices.

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. This data is expressed in US dollars per watt, adjusted for inflation. IRENA (2025); Nemet.

International PV module prices, driven by Chinese averages, will likely rise from \$0.08/W to \$0.10/W today to \$0.11/W by the end of 2025 and potentially \$0.13/W by 2027, says Clean Energy Associates (CEA), noting that heterojunction and back-contact technologies now make up 12% of global module.

We compiled our platform median solar panel pricing data from more than 95% of the U.S. supply into a free quarterly pricing insights report. This trend data tells the story of the U.S. distributed generation solar module market's last quarter. Example graph from Anza's Q3 2025 Solar Module Pricing.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable.
