## Overview

---

Montenegro has taken a decisive step toward modernizing its power system with a €48 million investment in large-scale battery energy storage systems (BESS).

Montenegro has taken a decisive step toward modernizing its power system with a €48 million investment in large-scale battery energy storage systems (BESS).

Montenegro has taken a decisive step toward modernizing its power system with a €48 million investment in large-scale battery energy storage systems (BESS). State-owned utility Elektroprivreda Crne Gore (EPCG) has launched an international tender for two commercial and industrial energy storage.

These systems promise to revolutionize the stability and efficiency of the national grid, marking a pivotal moment in the country's journey toward a cleaner energy future. The energy sector in Montenegro currently stands at a crossroads, with a mix of traditional hydropower and thermal power plants.

Montenegro's state-owned power company, Elektroprivreda Crne Gore (EPCG), is pioneering the installation of battery energy storage systems (BESS) to enhance energy system efficiency and support renewable energy integration. Main Content: Elektroprivreda Crne Gore (EPCG), the largest state-owned.
