

## A-Core Container

# Morocco container power generation manufacturer

## Overview

---

How will Morocco diversify its energy mix?

In order to meet the growing demand for electricity and address certain issues arising from the significant expansion of renewable energy, Morocco plans to diversify its generation mix by increasing the use of liquefied natural gas (LNG).

How can Morocco improve the security of the energy supply?

The Government of Morocco seeks to increase the security of the energy supply by reducing dependence on imports, including increasing the use of renewable sources for electricity production. As of the end of 2023, the share of renewable energy in the electrical capacity mix stood 11.42 GW (ANRE data).

Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

How much solar power does Morocco have?

Morocco has an average solar potential of five kilowatt hours (kWh) per square meter per day, although this varies geographically. Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power.

How much wind power does Morocco have?

Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power. At present,

Morocco has an installed capacity from wind energy of 1,650 MW, the second largest volume in Africa behind South Africa.

How much electricity does Morocco produce in 2023?

According to the National Electricity Regulatory Authority (ANRE), Morocco's electricity production in 2023 came from coal (64 percent), hydroelectricity (0.8 percent), fuel oil (3.8 percent), natural gas (10 percent), wind (15.4 percent), solar (5.1 percent), pumped storage power plants (PSP - STEP in French) 0.4 percent, others 0.4 percent.
