Morocco makes polymer lithium battery packs

Overview

CNGR Advanced Materials and the African investor Al Mada are planning a joint venture to produce battery materials in Morocco. The exact location for the plant has already been announced, as has the start of production - provided the official permits are granted in time.

CNGR Advanced Materials and the African investor Al Mada are planning a joint venture to produce battery materials in Morocco. The exact location for the plant has already been announced, as has the start of production - provided the official permits are granted in time.

Thanks to its natural resources, advantageous geographical position and strategic partnerships with global players, Morocco aims to become a regional hub for sustainable technologies for Africa and Europe by investing heavily in the lithium and electric battery industry. The country aims to develop.

Since 2023, several Chinese lithium battery industry chain companies, including CATL, Gotion High-Tech, Sunwoda, BTR, Huayou Cobalt, CNGR Advanced Material and Tinci Materials, have collectively invested in Morocco and built factories. The battery industry chain centered around LFP is forming.

On June 25, 2025, COBCO officially inaugurated the first phase of its cutting-edge integrated industrial complex for nickel-manganese-cobalt (NMC) precursor cathodes (pCAM) in Jorf Lasfar, Morocco. This pioneering facility, with an initial capacity of 40,000 tons, marks a significant milestone in.

The establishment of lithium battery gigafactories in Morocco holds immense promise for the country's economy and energy sector. These facilities will not only produce lithium batteries for electric vehicles and renewable energy storage systems but also drive advancements in battery technology and.

The parent company, COBCO, is Morocco-based and is the fruit of a partnership between Al Mada and China's CNGR Advanced Materials. Rabat - COBCO announced the inauguration of the first lithium-ion material manufacturing unit on Wednesday in Jorf Lasfar. With a capacity of 40,000 tons, the project.

COBCO, a joint venture between CNGR and Al Mada, launched today a two billion dollar lithium-ion battery materials plant in Morocco, the first of its kind outside Asia, as it seeks to become a key supplier for electric vehicle and energy storage markets. The project aims to produce 70 GWh worth of.
