How is the energy storage market in Mozambique?

Mozambique's energy storage market is characterized by significant growth potential, driven by several key factors: 1. Increasing energy demand, 2. Abundant renewable resources, 3. Strong government support, 4. Investments from international.

Mozambique can become one of Africa's leaders in clean energy production and is on track to meet its 2030 universal electrification target. Expected total energy-transition investment between 2024-2050: USD 80 billion Current share of renewables in total power generation: 70% Expected share of.

With 300+ annual days of solar exposure and 40GW offshore wind potential along its 2,470km coastline, Mozambique's renewable resources could power green hydrogen production at scale [1]. The country's energy ministry recently revealed plans to allocate 15% of its \$2.3 billion energy budget toward.
