In Myanmar, inverters are available at different price points. Inverter prices in Myanmar depend on the type, application, and dealer. The various types include: A solar inverter is a vital component of a solar power system. Solar inverters convert the DC generated into AC to be fed into the local.

When used alone, the 5KW inverter can even work without a battery, helping Mr. Mike reduce his solar system cost, while selling excess electricity to the grid to increase income and achieve efficient use of self-power and self-use. It also has multiple protection functions, including overload.
